

Dear M.A.R.S Bio-Med,

After doing research on several recommended amalgam separators I decided to choose the LibertyBOSS because of the extended time between changing units. It is cost effective for our office. We have a 4 op office so our volume is not extreme. It was delivered promptly and if I had any concerns about installing it myself I was super surprised at the support I received from Jason Büyüközer!! He is phenomenal. He took the time to create a Power Point presentation with each of the parts I would need (with hyperlinks to the store) and step by step instruction. This is way above and beyond. He was available to answer my calls and we exchanged ideas and pointed out some deficiencies in my finished install which I fixed and feel very secure in the function of the unit.

I can't speak to the long term use of the BOSS, but customer support is A+++. I would recommend M.A.R.S LibertyBOSS to any office that is putting in an amalgam separator.
