

DRS. SNIDER & MARGOLIAN
DENTISTRY

We are so happy to have chosen to go with the LibertyBOSS amalgam separator unit. Not only is it more convenient, it has helped greatly with our suction. Before the LibertyBOSS was installed we had recommendations to replace our vacuum pumps, as our suction was low. Now that we replaced our Hg5 with a LibertyBOSS, we didn't have to replace the vacuum pump because changing our separator immediately boosted suction. It is much easier for a smaller office such as ours to not have to worry about disposal for 3 years!

We would recommend this product to any dental office with low suctions, looking to switch or in need of a new amalgam separator unit.

Thank you,
