April 20, 2015

Since our office replaced our old line cleaner Gobble, with the Mars BioMed Powerlinz Concentrate as our daily suction line cleaner. We have been very impressed with the quality of our suction in our dental operatories. We have confidence that they will not loose suction during a busy 10 hour day with 4 rooms running at full speed.

Combined with the use of the Clean Linz Liquid Concentrate, for our three month maintenance cycle for 8 days, we have noticed a huge difference in the performance in our suction volume as well as the reduction of the sludge & debris that is collected in our suction traps. Cleaning the traps is no longer the chore that it once was.

Powerlinz & Clean Linz are two very cost effective products for our office and not having a harsh chemical odour is a bonus, that we can all appreciate.

We will gladly continue to use these products for years to come.
