Our office, Princeview dental has been working with M.A.R.S Bio-Med company for last 3 years.

We started with installing the Boss amalgam separator. The Technician did great work, answered any questions we had and is always on the time. They are coming regularly to replace separator, and check in at least once a year. We never have any problems with them.

A year ago we start using their new product, evacuation line cleaner, PowerLinz.

We are so glad we chose them. All people at M.A.R.S are helpful, well educated, pleasant and always on time. We recommended them to all other Dental offices.

Best regard
